Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a waveguide connection, classified in class 333, subclass 256.
 - II. Claims 20-24, drawn to a screw assembly, classified in class 411, subclass 378.
 - III. Claims 25-32, drawn to a waveguide connector kit, classified in class 333, subclass 208.
 - IV. Claim 33-38, drawn to a waveguide interface, classified in class 333, subclass 254.
 - Claim 39-41, drawn to a method of adjusting orientation of a waveguide,
 classified in class 333, subclass 209.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and (II, III, and IV) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination of Group II requires a particular screw orientation, Group III requires, for example, a non-circular profile, and Group IV requires, for example, curved slots and counterbores. The subcombination has separate utility such as a screw fastening

Application/Control Number: 10/601,753

Art Unit: 2817

means (group II), a kit for connecting waveguides together (Group III), and an interface means (Group IV).

Page 3

- 3. Inventions (I, II, III, and IV) and V. are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case waveguide could be used in a fixed orientation rather than be adjusted.
- 4. Inventions II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as for securing resonators in a resonator cavity, invention III could be used for connecting resonator cavities together, and invention IV could be used for coupling a resonator cavity to a waveguide. See MPEP § 806.05(d).
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2817

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen E. Jones whose telephone number is 571-272-1762. The examiner can normally be reached on Monday through Friday from 8 AM to 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Pascal can be reached on 571-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
